1. Fleshlight Products and Other Sex Toys

If you want sex toys for cheap, Fleshlight toys aren't the best option. Cheap Fleshlight knockoffs don't get the job done – you have to pay for quality.

When new sex toys are released, there usually isn't a whole lot of fanfare about it. Most guys just aren't that interested in sex toys for guys, so most new toys get little to no attention. This may simply be because most guys haven't been introduced to modern men's sex toys. Once a guy has experienced what even the most basic, cheap Fleshlight toy can do, he often changes his tune and becomes interested in the newest sex toys.

When it comes to sex toys for guys, there aren't a ton of options. Most toys are just replicas of various parts of the female anatomy, whether they're vaginas, mouths, or asses. These toys generally don't do a lot in terms of new ideas, and the basic "pocket pussy" design hasn't really evolved much over the years. In many cases, there isn't even a lot of effort put into making these toys feel real. This has led to shelves filled with toys that are basically just featureless cylinders made of cheap synthetic skin.

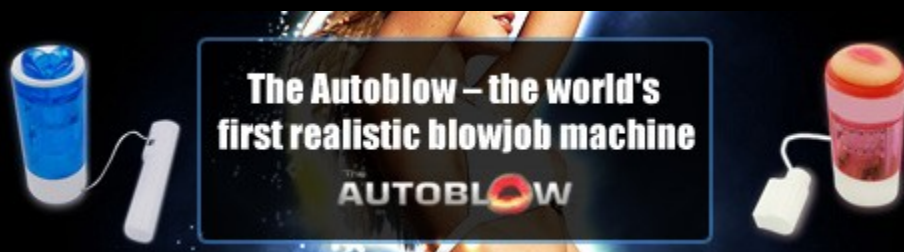

On the flip side of the coin, there are [sex toys for men](#) that are just entirely over the top. Take the RealDoll, for example. This is something that seems more like some kind of tech demo than like a real sex toy – and the price tag of several thousand dollars makes it pretty impractical for the average guy anyway. Besides, a lot of men are just weirded out by the idea of an actual sex doll – it's just too much! Even men who can't explore their fetishes with a real woman are likely to be a little put off by these sex dolls.

For another example of an over the top sex toy, consider the Venus 2000. This is a unique sex toy that offers a totally hands-free masturbation method. It's a big and bulky thing that costs a couple thousand dollars. While it does offer the ability to fine tune your hands-free masturbation to your liking, it's still a pretty big price to pay.

It's not really fair to compare the relatively cheap Fleshlight toys with these other extremes, but it just goes to show you what kind of toys you can get with a more modest investment. While a cheap Fleshlight isn't going to do the work for you, it does give you an incredibly real feeling experience for around \$60. Not to mention, a cheap Fleshlight toy is going to be much easier to store, clean and operate.

When it comes to sex toys that your average guy is going to actually be interested in and be able to afford, you can't really find a better value than the Fleshlight. Steer your browser over to the Fleshlight website and check out their Fleshlight selection – you'll be satisfied and you won't have to break the bank.

2. Customize Your Fleshlight Toy

One of the most enticing features of Fleshlight toys is that they can be customized. Choose your favorite Fleshlight options and enjoy!

Build the Fleshlight of Your Fantasies

If there's one name that always seems to come up when talking about [male sex toys](#), it's the Fleshlight brand. This toy rose to prominence due to a few different factors, not the least of which is the incredibly realistic skin used in them. While that's always been a big draw for these toys, the favorite feature for many men is the wide range of options available for these toys. In just a few steps, any guy can get the perfect sex toy for his needs.

Making your own custom Fleshlight couldn't be easier. It only takes three quick steps. Step number one is probably the least important of all – just choosing the color of the outer casing. As you may know, these toys are shaped like flashlights, and you can choose the color of the outer shell that holds that actual toy. Some guys prefer the clear casing that allows them to see the action while they use the toy. Other colors include black, silver and blue – choose your favorite!

With that step complete, you're on to the more exciting stuff. Step number two is to select an orifice. While many people refer to Fleshlights as “pocket pussy” toys, they aren't all shaped like pussies. You can go with the classic “pink lady” labia shaped opening, but you can also opt for a mouth or butt shaped hole. There's even a more discreet slit-shaped orifice that makes it look less like a sex toy.

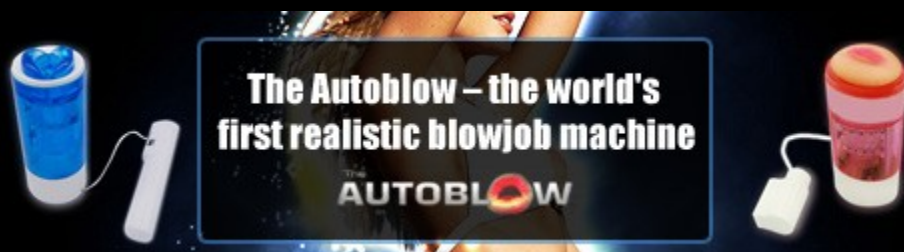

This choice is a simple matter of preference. Do you love nothing more than a good blowjob? The mouth is for you! An anal fan? Go for the butt! If you can't choose, remember you can always get another Fleshlight.

Step number three is by far the most important and interesting one. In this step you're choosing the inside texture of your toy. The orifice you choose is only a small part of the sensation – the texture actually provides the bulk of the feeling.

You have a lot of options for this step. The standard texture is quite simple and is basically what you'd find in any other male sex toy, just a smooth texture. You can get this texture in normal, tight or ultra-tight variations. But why settle for the boring when you could get something more exciting like the “Wonder Wave.” This is a texture that's lined with ribbing to provide a unique sensation. That's just one example, though. There are many different textures that each provide a unique sort of sexual pleasure. You'll want to collect them all!

Your perfect Fleshlight is just waiting for you to design it. It's time to start making masturbation great every single time. Let these amazing toys change give you the ultimate in pleasure.

3. Accessories for the Fleshlight Sex Toy

The Fleshlight sex toy brand makes great toys that are even better with accessories. Read on to what accessories are available for the Fleshlight sex toy.

The Fleshlight sex toy is the number one name in male sex aids because it offers a superior quality product. These toys have some great features, such as the realistic “Real Feel” skin and special textures that redefine the way a man experiences pleasure. If you own a Fleshlight sex toy or even a couple, you may be thinking that there’s no way that these toys can get any better. But have you tried any Fleshlight accessories? There are a few options for accessories that can make your Fleshlight sex toy experiences even better!

The standard option for Fleshlight sex toy accessories is known as a mount. These tools exist to give men a way to make masturbating with a Fleshlight more like real sex. One of the downsides of using Fleshlight toys is that they still require a lot of hand movement to enjoy them. Even if you don’t use the toy to jerk off like most guys do, you still have to hold the thing in place awkwardly while thrusting at it. This isn’t really the most comfortable way to enjoy your toy! If you want a way to experience a Fleshlight hands-free, you need a mount!

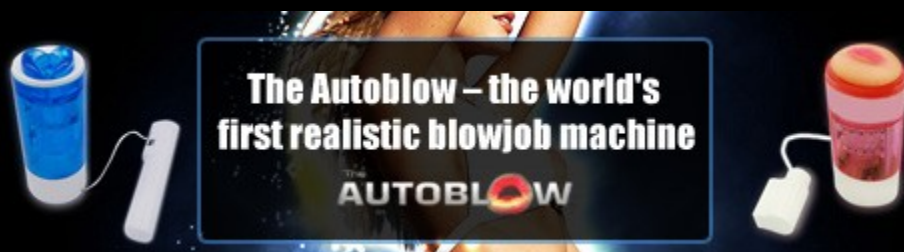

The Fleshlight company offers three different official mounts for [Fleshlight](#) toys, though you may also be able to find some third party options. The first and most basic mount is referred to as the “On a Mission” mount. This one is designed to help a man simulate missionary position sex. It’s essentially just a small “ramp” with a hole in it where the Fleshlight can be inserted. Once it’s inserted, the user can just climb on top and it recreates the same angles as missionary sex.

If you find yourself bored with missionary position, you may want to consider the mount known as the “Top Dog.” Doggy style is a very popular position with many people, and that’s exactly what this mount is designed to recreate. This mount is perfect for a guy to kneel on his knees and enter the toy from that position.

If that’s not enough thrills for you, there’s another doggy style mount known as the “Double Dog Dare.” This one features two holes on either side of the mount, allowing you to use two different Fleshlight toys simultaneously. If your favorite fantasy is a threesome with two hot ladies, this mount can be a great way to explore that by using two Fleshlight with different orifices and textures.

Fleshlight accessories aren’t cheap, but they can be worthwhile if you want to experience masturbation in a new way. If you thought you were having fun with your Fleshlights before, just wait until you try them with one of these great accessories!

5. Fleshlight STU: Improving Masturbation and Real Sex

The Fleshlight STU is a unique masturbation toy that helps you build your sexual stamina. Enjoy the Fleshlight STU during masturbation and have better sex too!

Enhance Your Lasting Power during Sex with the Fleshlight STU

If you ask a dozen different men what it takes to get women off during sex, you'll probably get a dozen different answers. If you were to ask a dozen women, however, you'd hear one answer pop up pretty consistently: in order for a woman to get off, she needs a man who can last a long time in bed. Women need regular stimulation over the course of several minutes before they have any chance of reaching their climax. Unfortunately, most men just can't deliver that. Most guys reach orgasm way too quickly.

Are you one of those guys? Hate to burst your bubble, but there's a good chance that you are even if you think you always get the job done. It's become pretty commonplace for women to lie about having orgasms during sex so as to spare their partner's feelings. Some women also feel ashamed that they can't orgasm during sex, even though the fact is that the majority of women share their problem.

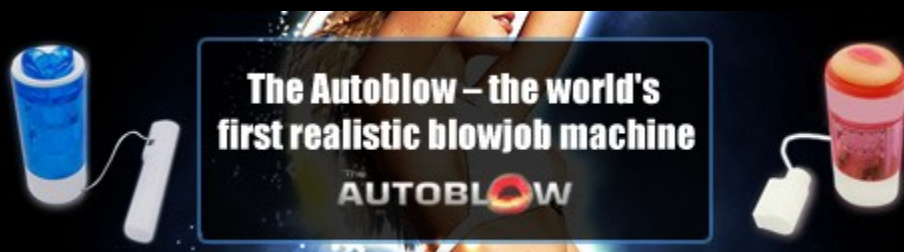

So what can you do about it? There are a lot of [masturbation techniques](#) that you can use to make sex last longer and improve your sexual stamina. However, there's one method that stands out as the best because it delivers the longest lasting results and its actually fun to do it at the same time!

You see, a lot of stamina enhancement methods involve doing things like wearing extra condoms or using numbing creams. These methods can work but they also limit how much pleasure the guy himself feels. While some men are willing to sacrifice their own pleasure so their partner can enjoy it more, it's not a sacrifice that needs to be made, so why make it?

Instead, what you should do is use the Fleshlight STU. The STU stands for Stamina Training Unit. This is a special version of the popular Fleshlight sex toy that is designed with one main purpose: to help men train to last longer during sex. Ultimately, you could use any Fleshlight toy to do this, but the Fleshlight STU is by far the most effective and efficient method.

This is because the Fleshlight STU has a special texture that is made to provide the most amazingly intense sexual sensations imaginable. Some people complain that the Fleshlight STU doesn't feel realistic enough. What they don't realize is that that's not necessarily a bad thing – the STU is in many ways more stimulating than actual vaginal intercourse. That makes it a more intense test of your sexual endurance, and thus a more effective training tool.
